

Competition Paved Way for 5G Revolution, Competition Must Guide 5G Future

Washington DC (July 14, 2016) – Today the FCC voted to move forward on a proposal that will speed the deployment of 5G technology.

In response to the FCC vote, Chip Pickering, CEO of INCOMPAS, released the following statement:

“Competition policy laid the foundation for 5G, and competition policy must guide the 5G future. Wired infrastructure is central to wireless growth, and the FCC’s business data service proposal will bring more competition to market, lowering costs, speeding deployment and increasing investment and infrastructure.

“We commend the entire FCC for their commitment and support of 5G, and look forward to working with them to ensure all American’s benefit from competition policy.”

About INCOMPAS:

INCOMPAS, the Internet and competitive networks association, is the leading trade group advocating for competition policy across all networks. INCOMPAS represents Internet, streaming, communications and technology companies large and small, advocating for laws and policies that promote competition, innovation and economic development.
