COMPTEL Introduces Alan Hill as Vice President, Government Relations

WASHINGTON, D.C. – COMPTEL, the leading trade association for the competitive communications industry, today announced that Alan Hill has joined the association as vice president of Government Relations, succeeding Bill O’Neill.

“We are pleased to have Alan join the COMPTEL team,” said Jerry James, COMPTEL’s CEO. “With more than 15 years experience working with the federal government, and over a decade spent with a focus on telecommunications policy, Alan is well known on Capitol Hill for his integrity and in-depth knowledge of the issues most important to our members.”

Prior to joining COMPTEL, Hill served as vice president of Federal Business Development for a major construction company, where he led the creation of the company’s internal division that focused on federal government contracts and developed partnership and joint ventures to support those efforts. Earlier in his career, Hill was director of Legislative Affairs at XO Communications LLC, representing the company and the competitive industry before Congress. He also worked on Capitol Hill for 10 years, most recently serving as legislative director for Rep. Cliff Stearns (R-Fla.), where he advised on telecommunications, energy and defense issues. Before joining Rep. Stearns’ office, Hill was as a legislative clerk for the U.S. House of Representatives Energy and Commerce Committee.

Hill earned a Bachelor of Arts degree from the University of Kentucky and also graduated from the United States Naval War College.

About COMPTEL
Based in Washington, D.C., COMPTEL is the leading industry association representing competitive communications service providers and their supplier partners. COMPTEL members are entrepreneurial companies driving technological innovation and creating economic growth through competitive voice, video, and data offerings and the development and deployment of next-generation, IP-based networks and services. COMPTEL advances its members’ interests through trade shows, networking, education, and policy advocacy before Congress, the Federal Communications Commission and the courts. COMPTEL works to ensure that competitive communications providers can continue to offer lower prices, better service, and greater innovation to consumers. For more information, visit www.comptel.org.
